Mud Control Grids

Dimensions & Weight

Specification	Value
Length	19 1/2 in
Width	19 1/2 in
Height	2 1/8 in
Weight per Grid	14.8 lbs
Weight per ft²	5.5 lbs
Coverage per Grid	2.64 ft²

Physical & Mechanical Properties

- Material: 100% Recycled Plastic
- Use: Ground reinforcement for paddocks, gates, walkways, and muddy areas
- Connection: Overlapping tab interlock system
- Load Capacity: Up to 5.6 tons per ft²
- Permeable design allows excellent water drainage
- Stable, self-supporting structure
- Weather, frost, and UV resistant
- Low maintenance and cost effective

Safety Information

- Non-toxic under normal use conditions
- Avoid inhalation of dust or fumes when cutting or grinding
- Use PPE such as gloves, safety glasses, and dust mask during processing
- Solid form is not classified as hazardous under OSHA regulations

Handling & Storage

- Store in a cool, dry location away from open flames and excessive heat
- Can be installed directly onto mud in many applications
- Use geotextile and granular base for long-term or soft-ground installations

Disposal

- Recycle whenever possible
- Dispose according to local environmental regulations
- Avoid release into waterways
